ARIZONA SCIENCE CENTER

SKELETONS: The Wonders Within is a travelling exhibition produced and managed by Science North. It was developed in partnership with *Skulls Unlimited* and *Arizona Science Center*.

Explore and celebrate

vertebrate biodiversity

through the science of osteology at

SKELETONS: The Wonders Within!

Exhibition Summary

***Skeletons: The Wonders Within* is the only traveling exhibition that has curated collections of real contemporary skeletons with informal learning experiences and opportunities for visitors to handle real bones!**

From assembling skeleton puzzles to mimicking animal movements, Skeletons invites visitors to follow digital hosts on a fascinating journey into the world of modern osteology.

Specifications

Space Required: **5,000 – 7,000 square feet**
Freight: **4 trucks**
Install and Takedown time: **10 days**

Exhibition Themes

Same & Different
Compare the anatomy of vertebrates and discover fascinating survival adaptations.

Movement
Vertebrate form and function help each creature live, move, eat, and travel in many ways.

Biodiversity & Conservation
Be wowed by the exhibition's largest and smallest skeletons, while exploring form, function, and connections to our planet's biodiversity.

Bones Tell Stories
Bones can give us clues into life, health, well-being, the ultimate cause of death, and what may have happened after death.

Key Experiences

- Explore over ***100 real skeletons*** – including large species such as a hippo, giraffe, and an ostrich!
- Discover how your ***Digital Host*** can guide you through the exhibition.
- Re-assemble a ***life-sized 3D replica skeleton***!
- Hands-on opportunities to ***handle real bones***.
- Engage with a real bone mystery to ***identify the animal using only its bones***!
- Competitive ***gameshow-style multiplayer quiz***!
- ***Photo Opportunities*** throughout exhibit.
